Summary

I am a mathematics PhD student at the University of South Carolina under the advisorship of Dr. George Androulakis. My research interests include set theory, general topology, functional analysis, quantum information, and foundations of quantum mechanics.

Experience

Graduate Instructor

08/2019 - Present

Throughout my time at UofSC, I have been an instructor of record. I have been a teaching assistant for Calculus I and Calculus II. I have been an instructor of record for Basic College Algebra, Calculus for Social Science and Business Majors, and Discrete Math for Computer Science Majors.

Mathematics Assessment of Prerequisites Troubleshooter

05/2024 - 09/2024

I assisted incoming students with their math placement exams during the summer. I was responsible for fielding students' problems with accessing the testing platform and resolving them in a timely fashion.

Scheduling Coordinator

04/2016 - 06/2016

I was responsible for constructing the tournament schedule for the main event and all side events during the 2016 National History Bee and Bowl held in Chicago, IL. My roles included programming a individual schedules for teams and individual participants, on site assistance, and interfacing with parents, teams, and participants.

Education

Johns Hopkins University

08/2014 - 08/2019

Bachelor of Arts Mathematics

University of South Carolina

08/2019 - Present

PhD Mathematics

Volunteer

University of South Carolina Math Department

05/2022 - 05/2023

Host of Fluid Dynamics

I was responsible for hosting the math department's sanctioned weekly social. I was responsible for helping first year students integrate into our department by introducing them professors and senior graduate students.

Awards

David L. Boren Fellowship

08/2023 - 06/2024

National Security Education Program

The Boren fellowship awards funding to graduate students in order to study critical languages. I was chosen for the 2023-2024 school year. I lived in Seoul, South Korea from August until June. While there, I participated in roughly 20 hours of language study per week at Sogang University's Korean Language Education Center. I went from having zero language skill to an intermediate speaker in this time frame.
