

CHASE FLEMING

Mathematician

Columbia, South Carolina, US cf17@email.sc.edu +1(864) 494-7378

flemingchase.github.io

I am a mathematics PhD student at the University of South Carolina under the advisorship of Dr. George Androulakis. My research interests include set theory, general topology, functional analysis, quantum information, and foundations of quantum mechanics.

EXPERIENCE

Aug 2019 - May 2026

Graduate Instructor

University of South Carolina

I have been a teaching assistant for Calculus I and Calculus II. I have been an instructor of record for Basic College Algebra, Calculus for Social Science and Business Majors, and Discrete Math for Computer Science Majors.

- Recognized by UofSC's Student Disability Resource Center for my excellence in assisting students with disabilities.

May 2023 - Aug 2024

Mathematics Assessment of Prerequisites Troubleshooter

University of South Carolina

I assisted incoming students with their math placement exams during the summer. I was responsible for fielding students' problems with accessing the testing platform and resolving them in a timely fashion.

Apr 2016 - Jun 2016

Scheduling Coordinator

National History Bee and Bowl

I was responsible for constructing the tournament schedule for the main event and all side events during the 2016 National History Bee and Bowl held in Chicago, IL. My roles included programming individual schedules for teams and individual participants, on site assistance, and interfacing with parents, teams, and participants.

SKILLS

CODING

Python

SAS

R

C/C++

Lean

Git

LINUX

Arch Linux

Linux From Scratch

TYPESETTING

LaTeX

AWARDS

David L. Boren Fellowship

National Security Education Program • 2023

The Boren fellowship awards funding to graduate students in order to study critical languages. I was chosen for the 2023-2024 school year. I lived in Seoul, South Korea from August until June. While there, I participated in roughly 20 hours of language study per week at Sogang University's Korean Language Education Center.

Summer Institute in Biostatistics

National Institute of Health • 2015

I was accepted for SIBS after my first year of undergrad. I spent two months at Boston University doing an intensive study in biostatistics. I was introduced to the SAS and R programming languages via studying the Framingham Heart Study data.

VOLUNTEER

May 2022 - May 2023

Host of Fluid Dynamics

University of South Carolina Math Department

I hosted the math department's sanctioned weekly social. I was responsible for helping first year students integrate into our department by introducing them to professors and senior graduate students.

EDUCATION

Aug 2014 - Aug 2019

MATHEMATICS

Johns Hopkins University

Bachelor of Arts in Mathematics

Aug 2019 - May 2026

MATHEMATICS

University of South Carolina

PhD in Mathematics

- Qualifying Exams passed in January 2021. Comprehensive exams passed in September 2022. Topics for comprehensive exams: Functional Analysis, Set Theoretic Topology & General Topology II, and Category Theory with a focus on proof formalization in Lean.
